

KAMMARI VIDYASRI

Kasavanahalli, Bengaluru, Karnataka

📞 9100948399 ✉ ukdvidya@gmail.com 🔗 [linkedin.com/in/kammarividyasri](https://www.linkedin.com/in/kammarividyasri) 🐙 github.com/vidyasri03

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate with strong skills in Python, C++, JavaScript, Data Structures, and Software Development. Experience in developing full-stack, cloud-based and backend applications through academic and project work. Passionate about solving real-world problems and contributing as a Software Engineer.

Education

Amrita Vishwa Vidyapeetham, Bangalore	Sep 2022 – 2026
Bachelor of Technology in Computer Science	CGPA: 7.33/10
Narayana Junior College, Hyderabad	2019 – 2021
Board of Intermediate Education	Grade: 92%
Sri Chaitanya School, Kurnool	2018 – 2019
Board of Secondary Education	Grade: 97%

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Software Development: SDLC, REST APIs, System Design Fundamentals, Linux Basics

Web Technologies: HTML, CSS, JavaScript, JSON

Cloud & DevOps: AWS (IAM, S3), Docker, Kubernetes, Git, GitHub, GCP (Basics)

Databases: MySQL, PostgreSQL, Firebase Firestore (NoSQL)

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication

PROJECTS

ResQLink – Crowdsourced Crisis and Environmental Response Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, REST APIs

- Developed a full-stack crisis response platform with real-time incident reporting, SOS tracking, and role-based dashboards for citizens, volunteers, and administrators.
- Designed secure REST APIs and backend services for report verification, volunteer task assignment, and reward management, ensuring efficient system performance.

Design and Evaluation of Digital Twin Framework for Cascading Failure Detection and Adaptive Resilience Optimization in Urban Infrastructure Networks

Tech Stack: Python, Flask, NetworkX, OSMnx, HTML, CSS, JavaScript

- Developed a Digital Twin platform to monitor urban transportation networks, simulate infrastructure failures, and analyze system resilience through real-time dashboards and analytics.
- Implemented backend services using Flask and integrated simulation modules for failure detection, performance monitoring, recovery optimization, and visualization workflows.

Carbon Credit-Aware Task Scheduling for Sustainable Cloud Services

Tech Stack: Python, Kubernetes, Cloud Computing, Particle Swarm Optimization

- Built a Kubernetes-based carbon-aware task scheduler using Particle Swarm Optimization (PSO) to optimize workload placement based on regional carbon intensity.
- Improved cloud sustainability by reducing energy consumption and enhancing resource utilization through intelligent scheduling.

CERTIFICATIONS

- AWS Cloud Computing Certification
- Data Science, Machine Learning and AI using Python – Diginique Techlabs
- Indian Sustainability Startathon – The Future Founders Co.

LEADERSHIP

- Coordinated and organized technical events as an Executive Member of the CodeChef Club, facilitating cross-team collaboration, stakeholder communication, and smooth event execution through structured planning.
